Thread: [Get near % 150 interest! Simple method! Min. investment! 5' of work!: final thread.](#)

f-Hacking_ph - July 2, 2020, 11:25 am

Hi, I dislike methods that requires investment, but most of times this is necessary...

In this opportunity I want to show you how can you make from \$ 10 near \$ 25, with \$ 20, \$ 50, and so on (aprox. % 150 of interest).

The only that you need in this case is to have at least \$ 10 to register in this site

<https://www.popads.net> and buy ads.

Then you need to register in the Paxful affiliate program, that is this: <https://paxful.com> !!

Paxful will pays you % 50 of each transaction that makes your affiliates from level 1 and % 10 from level 2.

A good thing of this affiliate program is that you can withdraw your money with only \$ 10 in your account and instantly!!!

Once you have registered in both sites go to PopAds and deposit your money.

Then start a new campaign and set your min. bid near \$ 0.05 per mil impressions (it's to say, 0.00005 per bid). Also try to set your audience to Finances, Money, etc.

With this minimum bid (\$ 0.05 per mil impressions) and with \$ 20 (for example) you can get 400,000 impressions, that converts near 20 affiliates, half will be active aprox. in near 2 or 3 day and perhaps they will make a transaction each one. Suppose each transaction is about \$ 5 min, so you will get aprox. at least \$ 50 with the \$ 20 investment!!!

As you have seen it is a very simple but highly lucrative method.

I hope you can put in practice and make a good amount.

Without more,

Kin regards and good luck!

Hacking_ph!

P.S.: Sorry by the double thread, but in the other Paxful give me the code for the Spanish version of the site. If someone can delete it I will appreciate it very much.

Regards.

Seems like a decent method, thank you for sharing.

Thanks man.

Sincerely by the moment I'm working on get affiliates, but from some proofs I've seem this works very good.

I have 2 affiliates from my campaigns from PopCash (due I have less than \$ 10 to invest) and from each 15000-20000 impressions I have 1 affiliate.

All seem to be promising, so I hope this can help you.

Regards!

Hi, testing the method with aprox. \$ 10 I've got about 10 affiliates.

The thing is that setting the bid to 0.05 ¢ per mil is impossible to get impressions, so you should set it to aprox. 0.33 ¢ per mil, and you will get the same results as in the explained method, it's to say, about 1 affiliate per dollar.

The question is that with 10 affiliates I haven't got any revenue in a week. The method where I got mine showed about half of affiliates activate in a few days, but I understand that is to get their affiliates... I suppose that with at least \$ 10 with time one can get some revenue, you should have present that is a revenue share scheme, and revenue share is profitable, but take some time...

Thanks for ear me and good luck!
