Thread: [Website for automatic sale of BTC balance + automatic balance transfer toward bank?](#)

Pe?cìl - July 6, 2020, 1:29 pm

Hello

- I am looking for a solid crypto website for my need hereafter please = Having automatic sale of BTC balance (to get \$ € whatever) + automatic balance transfer toward bank account/credit card (or even better, toward a linked Stripe) ?

Why I am looking for such feature ? I want to send money (BTC) regularly to a friend that doesn't want to spend 1 sec using crypto website. He just wants to see his \$/€ in bank after I have sent him my BTC.

Any idea please ? Thank you for your help.

That's going to be hard to find imho. I don't know any reputable services that offer this.

Maybe he can get a merchant bussiness account. Those have automated BTC->Fiat->Bank.

There is a service called Wyre which might work. They are connected to Coinpayments.
