Your best bet for selling tools here would be to create an actual sales thread, probably invest some money in Uber/Leet, showcase features and so on.

This thread only makes you seem very untrustworthy and I would not purchase a working time machine from you.

NYANxCAT - July 7, 2020, 10:02 am

I sell private crypt with runtime dyncheck all the time and there are crypters in hf that gives fud scantime.

Are you trying to sell it? If yes then please go sales forum otherwise tell me what is your point here and why you are showing off? Lol

Hey Nyan, do you have discord? Can you give me a way to contact you, I want to buy a mass logger and need to contact you to support me.

ropslide - July 13, 2020, 12:17 pm

You can't expect proper support from a free product. That's an unwritten rule. If you want proper support go for the paid ones.

Hello NYANxCAT!

Your private crypt has hidden startup and persistence features?
