Mate, skeet was godlike 2018, went down to shit back in 19 and is on par with most p2c rage cheats. Don't lick their shaft.

you can't even use the quote function right, go bend over and take it from those tranny mods.

Xamarin - July 8, 2020, 11:57 am

Ehmmm I don't have Skeet .. but from other cheats, I know that HWID unlock happens after you have opened the loader with your NEW computer. So what you say that the account is HWID unlocked ... seems a bit fishy.

Ask any top hvh'er, look up any video. Everyone in the scene agrees, skeet aint ahead anymore. The only thing skeet has is the fact that its never been detected and that it was untouchable in 2018. It got shit on in 2019 when they refused to update their shit and after they updated it, it came back to the top for very short moment. Now everyone whos in the scene agrees that skeet is an par with alot of the other big providers.

People lick skeets ass because they think its "hard" to get in, yet skeet has so many registered users now, its as public as any other "invite" "application" cheat.

Again, you clearly like licking skeets ass, as seen in your other comments, so i feel like this isn't going to convince someone as blind as u.

Dick riding a dead cheat? xd I gave Ev0lve as an example, telling me I fangirl over them is just plain

stupid, but we can't expect more from you, can we?

Aimware, onetap and fatality all 3 can stand up against skeet. Skeet was only ahead cause esoterik had unique ideas, which has all fallen into the norm today. Stop licking the shaft mate, it can't taste that good.

WAIT WAIT LMFAOOO

I been out the scene since like 2015-2016, but "trans cat girl"?? Is that the one fucking kid who got repfuk'd years ago for scamming a slotted csgo cheat- that ended up being a pasted public cheat.

ev0lve was a bad example.

nemesis and ot are just as good as skeet, especially in MM.

ot is an onshot ripper (and im doing a lot better with OT than i do skeet rn)

and nemesis i think has better antiaim/resolver

if either of those hacks had fakeduck in MM it'd be better than skeet entirely for me considering i only play wingman

legitsenseuser - July 9, 2020, 2:50 pm

tf lol.. aimware and skeet are top tier when it comes to hvh. i have NO idea how you even came up with the idea to talk about evolve, no trashtalk but it cant even comepete slightly

tbh

i think for mm it goes

ot > nem > skeet

i dont play community hvh but i'd take a guess it is

nem > skeet > ot

ot's onshot for mm is insane like no other cheat i've used lol, it's so fun rippin people in MM, and the aa script i have is good, and it's either the js i have for aa or slowwalk but it's just as good as nem's (though i still think nem's aa/slowwalk is better in general).... skeet, though.... i cant play mm with skeet. it's only purpose for me injecting tbh is fakeduck, some maps fakeduck singlehandedly wins the game depending on enemies playstyle (if u go apts on inferno and im fd'ing with skeet, kiss ur W goodbye :D)

Im yet to see nem beat a skeet user that has a good configuration of both config and luas, most nem uses just walk around using DT unscoped lmao.

this comment just seems like pure bias, tbf.

i'd say a very very low portion of hvhers in general just walk around using DT unscoped. i think the best nemesis user would beat the best skeet user. better resolver, better antiaim.
