Thread: [Corrupted .7z file from header.](#)

**Miiyr** - July 8, 2020, 10:55 am

Hey, i'm doing some chpyher challenges, i don't understand how to pass a level.

I have a 7z header.

Code 7z<sup>1</sup>/<sub>4</sub>d<sup>1</sup>...'w7f.....RÒz.'Hfn<sup>0</sup>..^

qkqd.>ê~ï.:öL.©.üö3|X[ZU<sup>1</sup>/<sub>2</sub>.£)-ôìÚ'.ï'.£.+aÖ.è.ç..Hs&UKv<sup>-</sup>T..zÝ.I.e.ø..ÉçzzP.VQì°úG..dåqđ.ru.Ä...  
.. f.....#....]......f..

.ê..µ.....I.Y.o.u.'r.e. ..a.m.o.s.t. .t.h.e.r.e... .K.e.e.p.q .i.t. ..p. .;.-.)....

....e<sup>-</sup>.mÔ..... .µ..(I changed the actual code, it's just for example purpose.)

I don't know what to do next with this. I assume I need to create a 7z file from this, but i don't know how, and maybe it's not what I need to do.

Thanks in advance, take care !

Miiyr

Text isn't suitable for analysis.

Upload the file itself, and maybe somebody can help you.

**Miiyr** - September 7, 2020, 3:10 am

This is the file itself, if you want you can copy-paste it on vim to create a .7z file.

**ETH** - September 7, 2020, 3:38 am

Use the hex editor to check that if the 7Z header is correct or not ?

Most of the file headers are here

[https://en.wikipedia.org/wiki/List\\_of\\_file\\_signatures](https://en.wikipedia.org/wiki/List_of_file_signatures)

You could check here too

<https://www.7-zip.org/recover.html>
