Thread: [Instructions on how to make super profits from #](#)

boruto6677 - July 9, 2020, 2:01 am

Hello, I am making money from # with a great method. I have tried it a lot of times over the past few months, I have earned 0.2 btc from the 0.01 btc I loaded.

Images I have used my method over the past few months:

Yes, I am a new member of HF, I am making money from # with a great method. I have tried it a lot of times over the past few months, I have earned 0.2 btc from the 0.01 btc I deposit.

I don't know how long my method will work, but for the time being I'm using it normally, I'll show it to you, there's no need for any software to support it or any bots, just need the method and you need to do it yourself, it only needs 1 hour a day, and especially only make up to 20% of the money each day, otherwise your account will definitely evaporate.

Apparently website you're trying to post is blocked, I wonder why? You're gambling mate, gambling will always be a loss no matter what.

Of course I know gambling is extremely risky, but in # I clearly realized it had rules. Obviously, this site doesn't use random numbers. I know its rules, I can earn money, I have x20 amount of money in the account as in the picture. It's true. I also made a recommendation, you will only earn money from it if you take small profits.
