Thread: [Elision uid=1011943 - Faking payment proofs?](#)

Cyam - July 10, 2020, 5:58 am

I'm surprised no one is doing anything in regards to Elision faking his payment proof

<https://hackforums.net/showthread.php?tid=6077384>

<https://hackforums.net/showthread.php?tid=6075414>

I never saw a Paypal where there is not a dot or comma in 4 digit balances. Also his GIF proof looks kinda fast and fake.

I might be wrong though, but here is screenshot in case he deletes it all:

<https://i.imgur.com/UFjKnBw.gif>

<https://gyazo.com/4aa963b853125866a7c054a3e118b186>

I'm happy to remove the thread if I'm proven wrong, but as far as I'm aware, this is completely fake.

Go shit on me cause of my open deal disputes, but I still care about HF

SIM-4771460 - July 10, 2020, 7:39 am

He just used Inspect element trick, also when recording with gyazo, there is pause button outside.

On refreshing paypal takes time to load, He pressed F5 button to refresh and in between he pressed pause button, used inspect element to edit it again., and resumed the the gyazo recorder.

Also take a look, how his mouse suddenly disappears

Guardis - July 10, 2020, 7:46 am

I don't know anything about him, but I've opened a similar thread in the past about someone else.. nothing happened.

spoon - July 10, 2020, 7:50 am

Anyone buying a " How To Get Rich Fast " Method deserves to get scammed any ways !

Cyam - July 10, 2020, 9:20 am

(Jul 10, 2020 06:49 AM)Mao Wrote: [\[CITE\]](#) Im 99% sure there isnt a dot on 4 digits. I dont think its fake.

That's a bold statement, every 4 digit number on Paypal I saw had dot or comma so

Zero - July 10, 2020, 9:28 am

I changed my balance from USD to different currency just so I get 4 digits.

Cyam - July 10, 2020, 12:27 pm

(Jul 10, 2020 09:28 AM)Zero Wrote: [\[CITE\]](#) I changed my balance from USD to different currency just so I get 4 digits.

That is what I'm talking about, I know that 4 digits have comma and dot. There is NO WAY that there won't be anything in between, no matter if your PP is from Europe or America

Perileos - July 10, 2020, 12:29 pm

Of course these ebooks fake income proof. Any financial company will display a comma or period in a number with 4 digits.

Accord - July 11, 2020, 10:32 pm

This really is a bit suspicious, theres really should a dot or comma if it is 4 digits, unless theres a paypal option for that

SIM-2327840 - July 12, 2020, 12:32 am

[?-Elision-](#) whats your explanation behind this?

?-Elision- - July 12, 2020, 12:43 am

(Jul 12, 2020 12:32 AM)Mao Wrote: [\[CITE\] ?-Elision-](#) whats your explanation behind this?I'm not sure, I have multiple currencies and exchange them when needed. I don't need to make fake proof of 2 grand- I have way more in the bank than on my PayPal due to obvious reasons.

I don't use PayPal belonging to any North American country or even Europe, and I don't feel obliged to disclose personal info about my location/PayPal country. Rest assured the comma, dot structure being discussed here isn't standard amongst all PayPal locations. Perhaps someone has a similar PayPal & can chime in.

There is also video proof. It's up to the viewer to interpret it - if you don't trust it, simply don't buy it - simple as that.

If perhaps a customer questioned this, I wouldn't mind showing my crypto and PayPal balance via Teamviewer.

Ones that believe its fake, I discourage you to think about buying any of my products or even considering it - or simply put me on the block list... fair enough?
Save your money and time.

Thank you.

I used Gyazo to record which has a 7 second limit, hence the mouse disappears after 7 seconds are done- I'm not sure how someone would be able to do all that in 7 seconds.

=====

Also, it seems like OP has 6 Open disputes with 6 different members and he never responded to even one of those disputes, I'd try to resolve those first before pointing fingers if I were you

mate...just a thought, that's all. No offence.

Also, these are some of your latest victims (JULY 2020)-

Jimmie - July 12, 2020, 1:01 am

Not sure about paypal but here is a recent deposit to my bank and it has dots. I'm sure they work the same way.

\$2,752.56

Sakhill - July 12, 2020, 3:47 am

My balance is over 1k so it's dot and comma, also I have available balance in usd which is above 1k and has comma and dot.

Eg. 1,234.56

On other paypal I have 40 bucks, and balance is 40.00\$

If there is screenshot needed will post, but definitely this proof are fakes.

I buy his method and it's worth few bucks which he looking for as you get everything and you are ready to start, but probably he fake it to boost sales :)

Accord - July 12, 2020, 5:19 am

Why the screenshot that youve provided on your sales thread arent displayed correctly?? did you opt-out those indicators or is it really edited/fake?

" I don't need to make fake proof of 2 grand- I have way more in the bank than on my PayPal due to obvious reasons."

Then why did you fake proof of 2 grand? ?

What about your 6 open disputes mate, I'd try to resolve those first before pointing fingers if I were you...just a thought... no offense.

Sakhill - July 12, 2020, 12:44 pm

That's bullshit that paypal have different version of their system for other countries.
Clearly you have usd as main value on your account so....
But ye anyway, only how you can prove it now is by sharing the screen.

It's not about that if we don't believe just don't buy, it's that new customer will believe that they can make money which you show for them and they will fall on that and you know it, personally I don't mind but there is no point to lie and make fake earnings proof.
I was buy your method and it's nothing unique and nothing new, but you put a lot of links and other things which will help to other people who like that to start with, so it's worth this few bucks as you spent your time on it but proofs are fake.

I'm kinda used at people bringing up my open deal disputes, and yes, I'm aware of them and I'm guilty, but that's not the point of my thread. Just because I have open deal disputes doesn't justify you faking your payment proofs.

And you obviously didn't have anything better to say so you just went with "Oh yeah I'm rich I have way more than 2 grand, so my payment wasn't faked". We both know that's a complete bullshit.

Sakhill - July 12, 2020, 1:26 pm

Better make fake proofs than scam people, so if you are guilty go and return money to all these people, karma is a bit*h believe me ;)

?ytes - July 12, 2020, 6:21 pm

Can't say about other Countries, but with USA PayPal, if you have more than a thousand bucks, it shows up like \$X,XXX.XX

Suppose I have \$2.35K and 50 cents, then it shows up \$2,350.50.

Other Countries might have the . and , missing, can't tell for sure.

Sakhill - July 13, 2020, 12:32 am

I have paypal from 2 different countries and they are both same do you really think that paypal change that?

And at all he have usd as main value so it has to be x,xxx.xx

<https://hackforums.net/showthread.php?tid=6075414&pid=59909925#pid59909925>

Look at that hahahaha :D

That's pretty awful but with no evidence doesn't mean it's Elision.

It doesn't have to be him, but he used fake contract and fake payment proof lmao

Angela White - July 13, 2020, 8:22 am

Could be fake but what he said about Gyazo GIF is true (it has a max recording of like 7 seconds and after the 7 seconds it just cuts you off) and i believe there are some currencies that don't use commas when dealing with currency. Not sure, either way just don't buy money making methods let all the new guys figure that out themselves

Cyam - July 13, 2020, 8:23 am

Why not show it to someone who posted on this thread so you prove us all wrong? I don't see why that would be a problem, you can hide your personal information with notepad

I'm giving him the benefit of the doubt but it is kind of weird that he's so worried about privacy that he doesn't want people to know what country his PayPal account is set to but is 100% content with allowing a random stranger off a hacking forum to remotely connect to his PC to view his payment logs & see more info on his PC than we would from another GIF.

I still believe that the no comma thing is probably due to his location but being that weird about people knowing your location but being ok with them remotely accessing your PC with thousands of dollars on it, then eh.

Your customers could just look at what time it is on your PC, and see which countries don't use commas when calculating their currencies (and they can see your first name appear in multiple places on PayPal.com), and find what country you're in off of that. so you might as well just take a video showing only what people want to see instead of revealing everything.
