Thread: [\[FREE\] PapoteMalote's RDP Cracker](#)

PapoteMalote - July 11, 2020, 12:40 am

Today I will be releasing a free RDP Cracker. You just need to import IP's and a combo list username:password, and let the program work.

Tested on virtual machine and VPS and 100% working. No key needed.

Remember this is a BETA release and may have some minor bugs. Any feedback is really appreciated, and don't forget to check my other software developments.

EDIT: Too much PM's .. Posting download link. Enjoy!

appreciated, and don't forget to check my other software developments. Thanks for sharing this great program and good free alternative, I have few questions

Are these proxyless? Or is better I use VPN when "pentesting"?

Any limit on attack?

Thanks
