Would anyone be interested in seeing such a thing? Would you play it? Any suggestions that come to mind?

We're talking about a WoW themed Minecraft server.

How would you even go about this? Runescape yeah but WoW minecraft server would be kinda weird.

Same zones (maps), levels, similar questing, items, flying mounts, npcs, mobs. You just need the right texture pack and it'll feel and look a lot like WoW. :)

I mean if you want to do it then go for it but that sounds like a hell of a lot of work for something that has a small succeeding chance.
