Thread: [E-Whoring Automation RDP's](#)

wolf360 - July 12, 2020, 2:17 pm

Hey,

Some People here on this forum got the whole e-whoring process automated and i want to know which rdp's you are using that can simulate a Android to do all the stuff that happens on Snapchat. Already got the Tool only need a proper server where i can run it on since german internet is chaos rn.

JizzyJade745 - July 13, 2020, 2:16 pm

I like rdp.sh but they never have any stock for RDPs. [censored] is also pretty alright, and relatively cheap but odds are you'll probably need to rent residential ips from a company like luminati proxy if you plan to do anything on them because they use commercial ips.

oh and if you feel like sharing some information back to me in regards to your automations. I'd love to hear about it, because I love automation in this field. feel free to DM me.
