There are different ways of disabling their account by reporting or hiring someone to crack the password to the account.

Don't try to hacks any account to dealet a page. see if you genually wants to dealet a fanpage than you can or not it's depends on the same conditions like ifvthat page have lots of follow and likes and good daily engagement, than oly you can't delete that page becasue numbers does matter.

BUt what you can do collect some peoples who can report that psge behalf you, and hit reposrt with the same reason, may be it's works.
