Recently, I was looking out on different types of botnets to buy and I run a into a few expensive ones, far much expensive than what I have used in the past which is formbook. But formbook is cheap which makes me curious if it is anywhere near anything those expensive ones can offer or maybe better? Which one do you advise I go for? Cheap formbook or one of the expensive ones? I need for get pass/users/active login sessions data.

Young Sosa - July 14, 2020, 2:06 am

there is no stable and well coded botnet for free, stop thinking that you can do everything for free, don't talk about botnets if you don't have minimum 2k to invest on it, otherwise will be just a waste of time bro

He did not ask for anything free, to be fair.

He asked for recommendations of what to purchase with these features.

I think it's now moved to Private Balloon China Release Bot..
ICQ: VgoStore for more info about it

stop promoting your scams here you moron.

formbook project has been discontinued long time ago and xloader took its place.
