Thread: [Bank App - Design + Animation](#)

Mister Slyther - July 13, 2020, 12:28 pm

This is one of my experiments I did during my free time.

Design + animation time = 20 hours.

Preview smooth version here: [https://drive\[WARNING POSSIBLY INFECTED\]google.com/file/d/1fL5kaPREMn5T8he4sXdaG-T5ab0WohaY/view?usp=sharing](https://drive[WARNING POSSIBLY INFECTED]google.com/file/d/1fL5kaPREMn5T8he4sXdaG-T5ab0WohaY/view?usp=sharing)

Using Principle, I was able to port this onto my iPhone XR. Works nicely as a prototype. Here's a preview of this as well, that is the incomplete version as I recorded it before I was done:

Maxie - July 13, 2020, 1:24 pm

That actually looks very sick. I also clicked around some of the links on your website and you're great at what you do. Keep it up.

S3AR - July 13, 2020, 2:19 pm

Very good & clean work!

Good job sir

Good job sir

Much appreciated, thanks guys.

vyactor - July 14, 2020, 6:05 am

Now, this is what I call a clean and neat design.

Although, what did you used to make animations? After effects?

SIM-3587630 - July 14, 2020, 6:10 am

It looks clean indeed. Good job.

Mister Slyther - July 14, 2020, 7:57 am

Thanks guys and I used Principle for mac.

Scottyj01 - July 14, 2020, 1:10 pm

My man John Doe is famous, great job on this design, so beautiful and slick, keep up the good work.

Fivio - July 18, 2020, 7:02 am

It looks pretty good but that just isn't my font. Maybe try with another one?

SIM-4757089 - July 21, 2020, 2:50 pm

Same idea with the font, the rotating circle seems not too practical

Mister Slyther - July 21, 2020, 3:00 pm

Appreciate the feedback, I went with that font choice due to it looking fancy from my perspective.

The circle may not be practicle, or rather, it isn't.

However, in experimental projects I like to execute my ideas and just see what they are like in action.

I like the creativity tho, these types of projects always spark new ideas. good stuff!

MuggleBorn - July 26, 2020, 3:41 pm

I like the animation, not my color choice for a banking app. Banking apps need to convey trust & secure which are primarily conveyed using shades of blue.

nice meme. color blue has jackshit to do with if a banking app is trusted.

MuggleBorn - July 26, 2020, 4:01 pm

I don't want to argue about my post, but here is an article about Psychology of Color in Logo's. The same applies for UI design.

Thanks for the feedback and interesting post, you are certainly correct about the meaning and the

implications of the color blue.

However...

1: Not all banking organizations need to use blue just because it defines and shows trust. There are far too many corporations limiting their creativity and design potential because blue is heavily overused.

2: HSBC, CashApp, and other examples that are not using blue in their branding, yet they are successful as an organization and are multi-national. This is evidence that they really don't need to be blue as you are implying.

3: My intention with using green and white here is to support green energy. Perhaps it would be cool to see a bank powered by green energy completely.

4: No matter what research says, and I do use research in some of my work (As I have a degree in Design (2020), I don't really want to let research define my work for this piece. It is purely experimental.

Bacardi Cola Lime - *July 27, 2020, 4:34 am*

Unique colors for an app! I think they are perfect for an app that has to do with money. The animation makes for a perfect presentation as well!

Bennywest - *July 28, 2020, 2:08 am*

Nice mate ! Beatifully :))
