Thread: [\[Ownership\] My Instagram Bot](#)

Angela White - July 13, 2020, 4:26 pm

Not in a huge rush to sell, they bring in decent money and I use them to pay my rent. Just wanting to start moving onto more projects that aren't HF based that I can actually use on my resume.

IG Bot makes \$500 - \$700 a month, can EASILY make more if you sell on more forums than just HF. It is quality software.

I had an auction going here before but I had someone who was going to BIN them but backed out and now I'm more just wanting a fixed price for it.

\$1,100 and you get full resale rights, the thread design, and code support for 1 month. I'll make sure you're making money off of it.

If you have an offer close to that and have the money ready I'll probably take it.

Show proof of funds and I'll provide proof of profits.

I'll offer support on this and will make sure you're making money off of this.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Still selling this, if you have near the required amount I'll most likely take it. Send me a PM.

funtela - July 24, 2020, 10:50 am

Not a bad price at all. Anyone can easily make that \$1k back in a month or less if they know what they are doing. I'll likely purchase a copy of the bot to try it out myself. I personally have been using Jarvee and MP for most of my Instagram automation.

StrongMinds - July 24, 2020, 10:55 am

Why would you sell a bot that sells 700-800\$ monthly for 1k? Clearly your profits are going down the drain, no need to deny it.

Nope, real reason for selling is that I don't want to continue selling shit on HF. Which is why my activity and my marketplace posts have shot down significantly. I do software dev work irl and it's starting to do well, so why waste my time selling \$20 copies of a program when i can charge someone \$800 to spend 3 days designing their website?

Yes it brings in \$700 - \$800 monthly but you also have to offer support to the buyers and deal with advertising the product & updating it. I have a way of making \$800 in a quarter of the time without having to offer anyone support or talk to anyone, so I'm switching to that.

You can either take the easy money or let it pass, up to you.
