Thread: [Hyper Scape - Did you try it yet?](#)

Beyonder - July 14, 2020, 2:08 am

I was wondering if anyone tried hyper scape yet?

I personally think its awesome and I love how it gives me an unreal tournament / quake feeling mixed with BR!

You can watch me whenever I am playing it ?

Its a brand new game, so not sure who is gonna stream it and who wont.

Saw a little bit of game play but tbh i don't think there should be anymore BRs being developed. It's plaguing the gaming industry by this point.

Weird, I feel the same about call of duty death match type games.

Guess people like different things.

Early impressions, fun gun, fun movement. Hard to aim. Doesnt play like a BR so much as an arena shooter but I enjoy it. It's free anyways.

I agree!

ever since Unreal Tournament and Quake 3 arena I have been hooked on games like that ?

I dont mind them making more BRs as long as they keep being free, then who am I to stop them ?

"Free" is the key word. Companies that pump out garbage half assed games with micro transactions is literally fucking the whole industry by this point. No one wants to make a new good

game because they can make more off of bullshit. Examples include BRs and ports to new consoles. Any company making a BR along with Bethesda and Rockstar is full of shit. The two companies literally don't do shit no more but pump out Fallout 76 which is fucked and Rockstar doesn't make content anymore because people buy old games on new consoles/PC

It looks super cool, would love to play it, the graphics look really chill and all but I don't have the time :(

It looks cool I keep on getting DC'd due to connectivity issues even though they have a SEA server idk what's the issue

I've had some connection issues today as well, but I think it's just a temporary thing.

Not today, since the alpha launch :(

Think the game is gonna die just like ring of elysium and other games of the sort.

it may or may not, I hope it survives !
I really like the Quake / Unreal Tournament feeling it gives me.

JDoawp - July 22, 2020, 5:01 am

Played a bit of it and so far it's one of my fav BR games coming in just above Apex due to its movement and how there's no set chars. Hope it stays relevant for a while / I hope they don't ruin it somehow.

bluud - July 22, 2020, 5:34 am

It's one of the best experiences I've had with BR's in a while. That being said I likely won't continue playing it.

I have so many other games I enjoy more sadly. CS:GO is most of my time nowadays.

Tbh, I like CS:GO but the fact that Hyper scape is fast as F, like Quake/Unreal Tournament, CS:GO will never live up to that!

CS 1,5 / 1,6 was the best shooter I ever played, but after playing that for countless hours, unreal/quake made the top 3 and Hyper Scape just mixed them together in a Battle Royale, I love it ?
