Where Can I play Poker while i Live in NYC

What Free VPN would allow me to or whatever or preferably if i dont have to use one..

Im looking for Free roll texas hold em tournaments and what not type of deal

888, pokerstars, any online casino really?

Or just park your car somewhere were you are allowed to play poker and download some official app / program.

Pokerstars has always been a great choice for me, otherwise any trusted betting site from your country is okay. Avoid offshore sites with a license in some 3rld world country.

I have always been interested in PokerStars. What type of \$ are we talking to do any kind of betting there? Can you get super small buy-ins and blinds?

There are some poker websites you can use that don't require VPNs, the one's I used to use shut down but there are plenty out there.

Try to use one of the more popular ones, like others have posted pokerstars is well received.

Great site that most people don't know about is 7XL.
I used to play there a lot.

Have tons of players and they accept Bitcoin as a payment method. Most of their players from countries like China and Israel Ukraine.

Always tons of tournaments and big activity. They never asked me for documents when I played and I never any issue withdraw funds.

Many rooms with \$100-200 buy in and even 1000\$ buy in so never bored there.

You don't need VPN by the way.

I use Bovada to play poker and sport bet highly recommend them. No need for a VPN, I'm from the states and Im able to play on it.

They run tournaments all the time. They are trusted as well I've been paid out over 50k from them. They do put you through the hoops and require ID verification and such.

Lmk if you want my ref link for them I'll shoot it over to ya ;)
