Anyone know the best way of leveling up a steam account? I seen you can get Gems and use them with bots but would like to know if there was anything else you can do ?

The way i do it is by getting free games and buy bunch of games which have cards. idle the games get them and then trade them in for full sets on a site like steam LVL UP or the easy way is buy a bunch of TF2 keys and buy full sets of a bot.

I traded CS:GO keys to card sets with bots (just google). Find the best rate, it goes pretty quick.

Bought some TF2 keys with BTC and everything worked out, instantly was able to trade to bots to get the desired level. Pretty dope I must say!
