Thread: [PornHub views bot that randomly likes the video and opens ads. | Multi-threaded |](#)

Tor - July 15, 2020, 4:03 am

Hey guys,

I've coded a pornhub views bot that supports multiple links running on multiple threads and proxies randomly liking the video and randomly opened ads. It randomly watches the video from 30 sec to 5 min.

It has a 10% chance to open any ad from all ads presents the the the on page. And this happens 40% the of times. The liking chance is 50% for each run.

All settings can be changed and other features can be added upon request.

Price: \$349.99 Limited offer.

I went from 171k views to 185k views in just a few days. Wasn't running the whole time and needed better proxies so it could be more!

I like that I can finally get my career going and make more then \$4 a month. With this should be making at least \$300 a month maybe more.

Tor is a skilled programmer and I appreciate him doing this favor for me.

I was expecting a download link to a program, but Tor took it to a whole new level of customer service. He setup the entire environment for me on my VPS and we were able to find really good deals on hosting and proxies. He answered all my questions and I can't wait to start earning some money with this setup. Thanks so much for the opportunity to make some money Tor and I hope this reviews gets you more sales as it should.

Thank you for the extensive review.

You should have probably specified that those earnings wore made with without the clicking on ads function on and with few proxies.

He is monetizing the videos he uploaded and that's how he earned the money. Yes, you can use the bot to increase your views. Opening a convo for more details.

He didn't view ads. He uploaded videos to pornhub and the code I wrote simulate people watching the video and clicking the ads on the videos page, which generates revenue.

Hey,

Was going to DM you but i'm new here and don't have enough posts yet to do so.

I am very interested in buying a modded version of your bot if possible, was looking at coding something like this myself but if the framework is already there I would much prefer to buy it from you instead.

A few questions:

1. Could this be set up to work with 100 proxies at a time all on different browser windows (so 100 video views could be achieved at once)?
2. Could it be set up to have a list of search terms and find a video on the search page (to achieve higher keyword rankings)?
3. Could it be modified to never click ads or like the video or anything other than search -> video view?
4. Could it be modified to range the view time from 20 seconds to 60 seconds?

Thanks!

Yes, you can set it up on 100 threads running 100 different proxies.

It really depends on the PC/VPS specs. But if more is needed you can always have multiple VPS/pcs.

(Aug 11, 2020 01:47 PM)mleah001 Wrote: [\[CITE\]](#) 2. Could it be set up to have a list of search terms and find a video on the search page (to achieve higher keyword rankings)?

Yes, I can implement that feature in if you want.

(Aug 11, 2020 01:47 PM)mleah001 Wrote: [\[CITE\]](#) 3. Could it be modified to never click ads or like the video or anything other than search -> video view?

Yes I'll make the setting changeable. And you will be able to switch it on off.

Change chances of giving like or chances to click on ads. Will also be a variable that can be changed.

(Aug 11, 2020 01:47 PM)mleah001 Wrote: [\[CITE\]](#) 4. Could it be modified to to range the view time from 20 seconds to 60 seconds?
