Daily fact #4

There are 2,598,960 possible poker hands for a 52 card deck meaning you have a 0.000154% chance of getting a royal flush. This is of course unless you are a [Bragging Rights](#) poster, in which case you have a 99% of getting dealt one because of your raw ability. Oh! And you once got head from Dan Blizerian... obviously.

Nice opinion, just one tiny problem with it. Inspecting your post, it looks like your opinion is different from mine. Let me tell you something, I am the baseline for opinions. Any opinion I hold is objectively correct and as a result, any other opinions are wrong. Guess what? You happen to hold the wrong one! I hope you know that your opinion is now illegal. I have contacted the FBI, CIA, the NSA, the navy seals, secret service, and your mom! You'll be sorry you ever shared your opinions, by the time you're reading this, you'll be done for. Nature will punish you, humanity will punish you. We decided just to make sure we'll nuke your house from orbit. So there's no chance you can run away, everyone will know you will die. It's a small price to pay, to remove your wrong opinion from this world.
