Thread: [>> \[FREE\] Send snaps from GALLERY! \[No Root\] \[No Ban\] <<<](#)

darkair - July 20, 2020, 5:04 pm

Hello! i've been in HF for quite sometime and never really had the chance to offer anything to the community so here's my way of helping out!

As some of you might know there are already apps that can do this being sold for about ~\$20 which comes with some extra convenient features and supporting iOS & Android, however this has basic features and this only works with Android.

The Method

If you have basic computer skills and the ability to follow video instructions here are the links that will help you make your OWN app!

Github Link :- <https://github.com/DarDur-Chickenbone/ChickenCam-2020>

Video Tutorial :- <https://www.youtube.com/watch?v=2FkhBCqLKNY>

The App - [you don't need this if you can make your own from links provided above]

here is the link to the app

<https://www.mediafire.com/file/8z1aj710hg39i02/SnapRev.apk/file>

and here is my discord - rev#8720

Inorder for you to use the app you'll have to let me know the username of the account you'll be using with the app so i can authorize it

[if you watch the video on how to make it yourself you'll come to know why this is required]

Note: When you install the app you will get a prompt by play protect this is because the app isn't downloaded from the app store and considered as a third party app, it's nothing to worry about :)

UPDATE : If you want to post pics to your story , use the memory method that is show in the GitHub page :) if you use the app it would say "Sent from "App Name" "

The end <3

LeaguelsGarbage - July 21, 2020, 4:58 pm

Does it work with emulators? like memu or bluestacks, their version is android version is 5.1 I think

darkair - July 21, 2020, 6:16 pm

you're more than welcome to try it, if snapchat works with your emulator then the app should work

aswell :)

LeagueIsGarbage - July 21, 2020, 7:25 pm

Yh the problem is finding an emulator that works w snapchat, although if I really have to I'll use it on my phone

darkair - July 21, 2020, 8:30 pm

(Jul 21, 2020 07:25 PM)LeagueIsGarbage Wrote: [\[CITE\]](#) Yh the problem is finding an emulator that works w snapchat, although if I really have to I'll use it on my phone
sure , i'll try and see if it works with emulator as it might be ideal to automate certain things.

LeagueIsGarbage - July 21, 2020, 8:38 pm

Good luck my dude, I'm cheering u on, I'll try to find workarounds as well

SweatShop - July 21, 2020, 11:57 pm

Just downloaded and added you, please message me back when you get a chance to add me on that list! Much Appreciated !

darkair - July 22, 2020, 2:24 am

(Jul 21, 2020 11:57 PM)SweatShop Wrote: [\[CITE\]](#) Just downloaded and added you, please message me back when you get a chance to add me on that list! Much Appreciated !
got u

LeagueIsGarbage - July 22, 2020, 9:09 am

I tried ur app, but it sends snaps with black bars, any workaround to it? If I simply alter the resolution the image will seem stretched, even vertical photos have blackbars

Mullamind - July 22, 2020, 9:20 am

Hey darkair i added you please for help

darkair - July 23, 2020, 12:42 am

(Jul 22, 2020 09:09 AM)LeagueIsGarbage Wrote: [\[CITE\]](#) I tried ur app, but it sends snaps with black bars, any workaround to it? If I simply alter the resolution the image will seem stretched, even vertical photos have blackbars

hi, if the image resolution is not the same as the screen resolution you will get black bars, you can crop it i guess, but hmu on discord, when i have time i'm looking to implement an auto-crop feature.

Glad you find it useful :)

SweatShop - July 25, 2020, 2:53 pm

App is highly recommended.. Works like a charm, only issues I would say that could be fixed if you want to call it an issue, is that if a video is more then 10 seconds it will state the video is too big to send to snapchat.

darkair - July 25, 2020, 7:18 pm

this can be implemented , like longer videos can be split into tiny bits of 10 sec videos, i believe the paid versions on here have that feature, i'm not too sure, but it's definitely possible, the code is obviously open for anyone to try it on github so yeah :D

Captain Pre - July 26, 2020, 3:32 am

HMU, I need 3 slots :)

Was looking for this! thanks in advance

darkair - July 26, 2020, 10:06 pm

all done :)

franky anon - July 27, 2020, 3:01 am

When using the application, I choose a photo to upload and I upload it, then snapchat opens and it gives me an error, is this normal? Or is it that the application has stopped working, or is it just happening to me?

Thanks for your great contribution :)

darkair - July 27, 2020, 3:20 am

added, please use PM or contact me on discord don't put your username here :D

SNAK - July 28, 2020, 3:54 am

Did it work with any emulator?

VikingRaider - July 28, 2020, 4:35 am

Great contribution - thank you for sharing.

darkair - July 28, 2020, 5:11 am

(Jul 28, 2020 03:54 AM)SNAK Wrote: [\[CITE\]](#) Did it work with any emulator?

didn't have the time to try it, it must work tho.

Hey,i've sent you a request on discord,Please accept it.

Thank you.

ProtoLogic - August 27, 2020, 7:23 am

blessed bro thank you, i been looking for one all morning!

darkair - October 13, 2020, 1:58 am

will be updating the APK today

jgers910 - October 14, 2020, 5:20 pm

Added you on discord. Would like this!

darkair - October 16, 2020, 5:30 pm

sorry i have been busy, i will update the apk and some other things, soon
