Thread: [Omegle Bot | Multi-Threaded | Custom Syntax Messages | Web-Panel Based](#)

Tor - July 21, 2020, 6:09 pm

Hey guys,

I've coded an Omegle bot that interacts with people and spams your messages.

The messages that are sent are built on the spot from multiple words to choose from so that it doesn't send the same message. This way the syntax will be hard to ban.

After spamming same text for a while that message stops being sent by Omegle. With this feature, your syntax will be safe and the message will always send.

It supports any type of proxies, but I recommend using rotating residential proxies for it to work perfectly.

You can insert mixed proxies because it auto-detects the needed protocol ex.http/socks.

When it hits captcha it just uses another proxy from the pool and tries again.

There are 2 ways of running multiple threads depending on which method you prefer:

1. Browser-based. Where it spawns multiple browsers with random user-agents on multiple threads depending on how much ram you have and how powerful your CPU is. Has the option to see or hide the browsers.

2. Request only based. Where it spawns multiple threads depending on how much ram you have and how powerful your CPU is and only does requests. Sustains more threads and runs faster.

You can run the bot on multiple pcs and for an unlimited time. When you purchase you get a custom license.

More features can be implemented upon request.

I have ran the program itself for about 3-4 days straight with no issues. For the price of \$100 lifetime, I would have to say is very fair in my opinion this is a fair deal. I have read the code, all the way from giving feedback and I would give Tor 9.9/10 overall everything.

Tor is by far the best seller I have dealt with, the price is fair, you never have any doubts about your purchase.

There really were problems at the beginning, but that was due to my lack of knowledge. To be honest, even as a seller I would have been annoyed. Tor remained absolutely professional from start to finish, helpful and responded quickly to all messages. No matter what problem arose in the software or in my implementation, he knew how to fix it. He advised me on which proxies to use and much more.

I will remain a customer for the next few months and am looking forward to further products. Tor is definitely my trusted dealer!

I had it in my pc for like 3 weeks. I forgot to add it to the market until yesterday. I might do the thread designs myself and see how they turn out. Thanks for the advice.

You can still sell your tool tho, I saw that there are few Omegle bots on the market and most of them have limited time licenses.

why we need HIGH end PC for multiple threads? is this bot browser based?

If you want many threads you will need a good PC. You can also run it on a normal PC but with fewer threads. Yes it uses browser instances to use omegle and you can see the tabs or hide them for better performance in a settings file.

Thank you for the kind words. Just finished v2 right now. It has req only feature now that makes it faster and you can use more threads when it's activated. V2 also includes webpanel/software version and it auto detects proxies protocol and you can insert mixed proxies like http/socks all together.

Soon will add other features like multi-pattern. You will be able to send different sets of messages using same bot.

Will update the thread with new features as soon as possible.

I am posting here to find my way back to your bot and perhaps some updates in the future.  
So far, I love what I see and read about it, including the vouch from Dorrance himself.

I don't need anything like this in the short future, that's why I'm posting here to find my way back once I need it.

Mobile compatible is something I am attracted too, as that's my main device to browse and do some little work.

I will implement today and the bot will be again available. Really sorry about those inconveniences but you guys all saw that most Omegle bots stopped working recently. Well mine didn't stop working. I just had some problems when I implemented the new req only feature as in it didn't take the correct proxy per session. Using a proxy on each req instead of per session id. I thought it wasn't important to inform you guys about it at that time. Anyways didn't have time to fix it on time etc. Will take care of it. That's all I can say. Just be patient guys. And again sorry for all those inconveniences. Peace.

I have been on HF for ~8 years now. I have had more contacts than my B ratings would suggest.

Tor is by far the best seller I have dealt with, the price is fair, you never have any doubts about your purchase.

There really were problems at the beginning, but that was due to my lack of knowledge. To be honest, even as a seller I would have been annoyed. Tor remained absolutely professional from start to finish, helpful and responded quickly to all messages. No matter what problem arose in the software or in my implementation, he knew how to fix it. He advised me on which proxies to use and much more.

I will remain a customer for the next few months and am looking forward to further products. Tor is definitely my trusted dealer!

Hi I have bunch of presale questions

- 1) Can I choose different languages per instance?
- 2) Can I define different text (for different languages) per instance?

I see good results with different languages than english with Omegle. But I cant find any bot, that is able to pick different languages.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

Is this bot still up to date? If so i'd love to buy it

**killaxia** - March 22, 2022, 9:41 pm

So im super interested in an omegle bot.. I have one i coded up and it works fine but i get banned pretty quick and then i gotta change mac/ip over and over and i get stuck on captcha! Can you maybe provide a like 7 day trial account for me to play with? if it works well and has a low chance of ban i will be buying a year sub!

**????** - March 24, 2022, 10:18 pm

Is this good and working still?

**SIM-5170530** - March 24, 2022, 11:09 pm

That's a pretty cool bot, what language is it wrote in?

**Tor** - November 27, 2022, 9:51 am

I never managed to make time to fix some bugs on this guys. If I ever find time to fix it ill notify you all. Until then all sales on this are halted.

**Tor** - April 10, 2023, 1:18 pm

No more for sale. Thank you all past clients.
