If anyone has a HWID Unban method or anything to spoof the HWID, as I have experienced, No HWID spoofers work.

If anyone has anything please feel free to pm me. Thank you

Lmao idiots thinking spoofers will work.

I'm done mentioning my method, works 100% no purchasing anything required.

Friend of mine is using something called "Valspoof" just look on epvp and you should find it.

I don't use it myself, but he told me it works and right now I think its the only working spoofer.

It starts with your PC aka before Vanguard, you need to judge the safety of that yourself, but I mean your already installing a Chinees rat so why not add another one xd
