Thread: [DDoS and DoS attack help.](#)

todMKD - July 24, 2020, 6:05 am

Hello. I am requesting help for finding a way to make a DDoS or DoS attack on an IP but i don't have money to spend on a botnet. Should i use LOIC or some other available app that you would recommend.

Thanks in advance.

Please follow the HF rules

<https://hackforums.net/misc.php?action=help&hid=21&highlight=DDoS>

Thanks

What exactly do you want to attack? Softwares like LOIC will damage your own internet, so if you want to do something simple that , you should use a VDS / VPS.
