Longdog's Official Rat and Botnet Setup

"The Most Knowledgeable RAT/BOTNET Source!"

Why Choose Me?

I have been using Remote Administration Tools (RAT) and Botnets since 2011. Instead of making this a huge long paragraph. I've decided to make bullet points to save us both some time and make it prettier on your eyes.

- Have used Java, .Net, C, C++, ASM, Perl, Python Bots.

- Have experience with malware on Windows / Linux / Mac. Have setup many nets on IRC / Apache / Nginx.

- Have knowledge on how Windows detections work. Have private scripts for linux botnets.

- Have knowledge on crypting and how to avoid Scantime and Runtime detections. Know good OPSEC and how to keep you from ever being found as the bot herder.

- I am on multiple malware dedicated forums and always keep my knowledge up to date.

Benefits of Owning a Botnet

Owning a botnet has many unique and useful features. It allows one to control many of their own PCs at once up to the hundreds of thousands. This eliminates the work of having to control one by one on each machine and do whatever task that needs to be done. Whether that be updating the machines with a new piece of software or being able to monitor what each person is doing at your workplace. This will give you an overview of what everyone is doing at any given time and provide statistics of what hardware each machine is using. Then we have the non-ethical side of things where you can own your own mining rig and make money like no one's business!

Stanley - July 29, 2020, 12:28 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Just bought from [Longdog](#) the whole setup. I'm not sure how you guys are seeing detections. Here is my scan from the file he made for me.

antiscan(DOT)me/images/result/wMmNDeDqHFIR(DOT)png

I highly vouch for him, he sat there for hours just to make sure that my file was 100% and that everything was working. Even taking the time out to explain via text where everything was. Do not hesitate to buy!
