Whats up HF, I am selling a list of legit wholesale company's to buy and resell products on amazon ebay any type of marketplace!

Some NOT all whole sale websites require a Vendors License to be able to buy from them

List of over 50 Websites for sale

Way better then Alibaba, I use this for my amazon store and eBay store.

The list will cost \$50

I took a look through these sites, and there are some absolute gems in here, easily worth \$1000+. Remember amazon FBA is work, so looking at these lists will do nothing for you if you don't want to invest a little, do a tiny amount of research, and send things into amazon. Honestly this is a good thing because it means things will be less saturated. Well worth the \$50 asking price

Can you pm me more info. Are these still from china or are they from us? Any chance you can give me a few samples of product and not the site. I have a specific niche I am already selling would be interested in buying.

Like someone said earlier is there a smaller list I can see first for cheaper etc.
