CryptoBust.io - BTC Based Crash Game

CryptoBust.io is a clone of the extremely popular bitcoin game Bustabit. While the rules and math are exactly the same, CryptoBust is built to be played with Bitcoins. We worked hard to ensure that we can provide a fair gaming experience for everyone, which is why we did a provably fair seeding event. You can find more information in the FAQ section on the version which you are playing!

How to Play?

Place a bet. Watch the multiplier increase from 1x upwards! Cash out any time to get your bet multiplied by that multiplier. But be careful because the game can crash at any time.

Why play at CryptoBust.io?

The chances are fair and we still use the Bonus system, we have a very low minimum withdrawal so you can try it for a few rounds without having a high risk.

CryptoBust.io ~ Join us ?

Dude, you need to add HTTPS in.. It's not secure :D

cryptobust.io - July 28, 2020, 3:05 am

will add that asap thanks for letting me know.

Having an image like this [IMG \(for some reason the img tag doesnt work\)](#) on your page but then not using SSL..

It takes like 5mins to set up HTTPS with lets encrypt. Not sure how serious I can take this.

But good luck with it anyways (:
