Thread: [Njrat Dangerous Edition v4.1 +HRDP +Reverse proxy +build Server Clean 2020](#)

Francesco Ctraik - July 28, 2020, 3:00 pm

Hello my friends.

I would like to introduce a remote control program with very powerful features.

Builder

1: Host Port is fully encrypted with 2: information. With the choice of your own encryption key.

2 Prevent the server from being killed by the operations observer

3 You can add the names of scanning programs or any program you want to kill when running the BIOS

4 hide the server completely. .. Hide the server inside the start file

5 Run as administrator.

6 Set icon.

7 Monitor keyboard directly.

8 bedrooms for a server

9 Run a link with the server.

10 direct link injection, such as a picture or a program or anything

11 Bitcoin mining

12 Server encryption is clean

13 Server injection in the computer registry

14 Server spread in all system files and disappears.

15 Download and install into the computer register

With js link Url vbs spread formats

16 Change the server layout

Bat bif com Scr exe

17 messages when the server is running

18 server integration

19 compressing and reducing the size of the server

20 Net From War 2.0 or 4.0

=====

Control. In the victim, noticeable all control via the Dll libraries

Monitor a victim's desktop manipulation. Browse files and monitor all communications. Lock and unlock files.

Sophisticated chat. Keyboard Monitor in all languages

Check out passwords. Skip ads and open an incognito browser. Reverse proxy

+ HRDP

Run a strong ransom virus. With an external decoder

Turning off the screen. Desktop Comment. Many advantages. You can discover it when you try it.

The lifetime of the copy is \$ 200

The price for the one-year version is \$ 139

Bitcoin payment

You can check the program before buying.

I leave you with the video a summary to explain the program

[contract=tid]Start Contract[/contract]
