amazon giftcards is what I use anyother methods other than bitcoin that aren't refundable?

Semmenial - July 30, 2020, 5:22 pm

CashApp is a good one to use. Just make sure they load it into their balance first, then pay you. So then the cashapp payment can't be reversed.

Venmo is also a good one I've seen people use.

Meow - July 31, 2020, 12:05 am

Amazon gift card is refundable, they just need to dispute their AGC transaction and your entire Amazon account will get locked.

Aside from that, look at CashApp, Apple Pay, and Venmo.

It's better to use cashapp and get level 1 verification and find some cashapp to btc exchanger. You can take amazon gift card but don't scam them, just give what they buy and talk a bit, be good :)

Babygirl1122 - July 31, 2020, 3:14 am

Everyone is mostly using Cashapp, Venmo, Apple Pay or Zelle.

Amazon Gift Cards are the easiest, you can exchange them to BTC on various websites.
CashApp/Venmo can both be easily created and verified, if you need help contact me.
PayPal is hardest to deal with but more people have it than CashApp/Venmo.
