You're right, our thread design isn't automatically updating to our website!
It's more of an information picture rather than active displaying information. Hope that makes sense!

I cannot say the exact figure or %, however it's not much or anything concerning. I play capped

200FPS and do not notice a difference. Everything is optimised and written in C++ so that helps! (This is nothing like the good old BoL days! :D)

(Sep 12, 2020 10:15 AM)Dotexe Wrote: [\[CITE\]](#) How is this any different than GoS and other joke platforms ?

Hey,

Well I would say we are very different from the other platforms. Here is a brief overview why I'd think that:We are reasonably priced.

We have a 24/7 support team that work around the clock to ensure all bugs and issues are resolved.

We are truly undetected, no 14, 28, 30, 60, 90 day ban routine.

We are internal. Most platforms that are out now including GoS are either a) external b) pixel-bots c) macros which are ok and will be far less expensive, however the performance of such would suffer greatly.

Being an ID verified community does promote maturity. Most league communities are highly toxic and not fun to be around.

We add compensation to subscriptions if the cheat isn't updated within a 24 hour period.

'OverSight - September 13, 2020, 2:52 pm

Update: I've been using Elocarry for a bit longer now and this place is amazing. I think it's really find something like this with this same price point and only being semi-p2c for a short period of time. The community members and the devs are great and the community is super active. Also, the devs are also very receptive toward suggestions and are pretty fast about updates/bug fixes. Zlitz has done a great job picking out former script devs from an old platform that I will not name but the talent Elocarry has is outstanding. If you're trying to scratch that itch that came from using L#, elocarry is getting really really close to L# tier and I believe it will surpass it at some point. Getting into this platform is def worth your time if you are looking for something HQ.

Milk Tee - September 13, 2020, 3:30 pm

I've been using elocarry for just over a week and it's definitely worth the application process/purchase. In terms of the actual cheat and scripts, they're very straightforward and easy to configure. I haven't used BoS before so I can't make a comparison but I can compare it to L# in terms of features. It's still in the early stages of development but that doesn't mean it isn't packed full of features. As this platform grows and develops I can see it as one of the heavy hitters in the scripting community.

diiiaz - September 14, 2020, 12:27 am

I'm currently a member on elocarry, since Joduska closed down I was looking for a new platform to play with. I never found an similar one that had the same quality as Joduska, until I met Elocarry.

Orbwalker is just perfect as it is and the general use of the program is just way to easy. Just open the program before going into a game and it will do the rest itself.

I've been playing with Elocarry over 30+ days now and haven't recieved any bans whatsoever, I'm optimistic that this isn't going to happen either because the staff really cares about there customers safety.

The staff is transparent towards there community and take suggestions seriously. They know what they want and push updates often on request of the community.

If you want some freelo and a good community, join Elocarry!

Anyone can provide invite link? Not feeling comfortable sending my passport scan.

SIM-1223642 - September 22, 2020, 7:27 pm

I've been on this platform in its early days and still am. There's a reason for that - because it works and Zlitz and the developers are very, I mean very active and work tirelessly to make the platform better. It pretty gives no frame or latency drops.

GoS and other platforms are child's play compared to EloCarry. With the amount of spare accounts you'd be buying on the other platforms, you're better off spending your money on EloCarry and calling it a day, or a diamond day rather.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

"We are vetted by the ICO and KYC officials"

Sounds like am about to buy cryptos.

"Being an ID verified community does promote maturity. Most league communities are highly toxic and not fun to be around."

Ain't really true. What does is the price at this point, and the fact that you're slotted. ID requirement is pointless and is a turnoff for many serious buyers.

Underaged kids just gotta take the ID of one of their family member and that's it. However, affording 100+ a month, they might not be able to do it.

On the other side, there is adults like me that do not feel that the justification is good enough, that does not feel like revealing their identities to random people/companies especially for cheats and whatever.

I personally (and I do know am not alone in this case) ain't even feeling to do it toward licensed billions worth companies such as coinbase which is almost seen as a bank for example. Just a random analogy tho, they do ask for KYC and stuff too.

Asking for ID to allow access to a cheat is plain nonsense for me but I do know that plenty if not the majority does not care. Some even sent naked pics of themselves to get into some csgo cheats so welp.

Either way GLWS, sorry for the renting it ain't criticism or trashtalking toward your product in any way.

Oh and lastly, imo some kind of "only awareness" version would be quite nice. I believe its one of the least wanted yet strongest feature. Personally would only use/need that.
