I'm going to be encrypting this since I don't want every leech to just download it.

Decrypt the pass. To avoid leeches.

Step 1: Reverse the letters of this hash: dd277bd7f5cf8e6a5606b3bc66ac477ade943cb9

Step 2: Decrypt the hash once you've reversed it. I'm not going to tell what encryption it is just look a bit it shouldn't be that hard.

Step 3: Once you've decrypted it use it to unlock the winrar file.

Please leave a vouch if the method works. & Don't try to resell this please. Also don't abuse it. :)

Then do the same with this hash to get into the actual method rar:

It's free!

Since too many people are having trouble look up letter reverser & reverse the hash then decrypt it with sha1

I got the password, but as I understand it is for the RAR file, what is the password on SafeNote? It's at least not the same as to the RAR.

**Shoelaces** - August 2, 2020, 1:23 pm

What is the password for the SafeNote? It's not the reversed hash

I reversed everything.

I then decrypted the hash to get a result. But the password doesn't actually work. Don't waste your

time with that ^^
