Thread: [\[\\$9.99\]\[Keylogger\]\[Very Stable\] - The Bypass V2.0.1 \[Hidden Process\]\[Built-In Stealers/Binder/Crypter\]](#) [\[Stealth\]](#)

Samuell - August 13, 2010, 9:25 pm

[IMG][http://i35.\[censored\].com/5p4ox3.png](http://i35.[censored].com/5p4ox3.png)[/IMG]

That's right, V2.0 of The Bypass is OUT! I completely remade the GUI (credits to AeonHack for the skin) and added a lot of nice new features + patched up some old ones!

The biggest new feature I'm sure you'll all notice is the ability to give simple remote commands to your infected victims (Remove Virus, Download File, Update Server). If you're planning to use this new feature, I highly recommend you check out SPAM.com.

Another major new feature you may notice is the Bot Killer. If you have this option enabled, when the server is first run on the victim's computer, it will remove any and all traces of any past infections made by The Bypass before injecting the new server into their system.

You may also notice that the prices have been LOWERED. But it won't stay this cheap for long, only \$9.99 for this amazing software + support? WTF?

You'll also noticed a new perk for all people who purchased the \$25 package (now the \$20 package) if you're a proud owner of a lifetime license of this software, you will receive an external scantime FUD crypter made by me for FREE. That's right, \$0.00 for an FUD Crypter. In terms of support, it's starting to get out of hand again, so I'm also looking into setting up a website + live support on there.

The Anti-Leak/HWID System has been COMPLETELY redone in this version, so if you're an owner of V1.0, you will have to contact me to get yourself registered on the new server + receive your new copy of the keylogger.

The Auto-Updater of V1.0 will NOT update you to this new version, you will have to manually contact me (Classical) to get your upgrade :).

drake_51 Wrote:Un-official Review 5/5

==

Quality of GUI: Amazingly noob-friendly, yet looks very professional. Everything is self-explanatory and easy to see. There is even a section where you can report any bugs straight from the keylogger, which is very helpful.

Rate 5/5

Ease of Usage: Very easy, in relation to the GUI, everything is very easy to find thanks to the sidebar. The keylogger also has an AMAZING feature in the self-crypter which will allow it to stay FUD, which saves the trouble of finding a separate crypter. The spreading will also be very easy, because its both scan-time and run-time FUD.

Rate 5/5

Easy of Vaccine : Infected yourself? Not a problem, simply use the built-in vaccine with the keylogger, and it will instantly rid you of the pest. I rate the vaccine 5/5, just because of the fact that

I've done every possible situation for it to screw up yet, everytime it detects and deletes the keylogger from the system.

Rate 5/5

What your paying for: On top of everything I stated earlier, you get all those little things that make the keylogger absolutly flawless, small things like [ALL BUILT-IN]: File Binder, Remote Downloader, Pumper , Mutex [to prevent infecting same person multiple times] , Log mouse clicks, P2P Spreader, MSN Spreader, LAN Spreader, USB Spreader . AND MORE!

Rate 5/5

Bottomline : Probably the best keylogger I've seen on this site, amazing for its price aswell. The amount of features this keylogger has seems to be un-ending. I was also a beta tester for this keylogger and can assure, the coder "Classical" has worked his ass off to make this keylogger what it is today, so stop reading and get to spreading !

Rate 5/5

My recommendation: A++ go buy it now!

(Aug 10, 2010 11:10 AM)NaDe Jr. Wrote: [\[CITE\]](#) Unofficial Review

Now many individuals think Keylogging is all about getting free shit. But whats free shit that will only last for 24 hours? It's about consistency, one of the qualities this keylogger does not lack, Classical took the time to make sure the logs being sent via email were clean & reliable, he wanted to avoid any potential complaints, I received the privilege of Beta testing this software, I tested everything from Stealers to File Binding etc, and from experience, I have the utmost confidence if you purchase this software you will not be disappointed.

Quality: 5/5

It is so simple to use a caveman could do it, the GUI isn't perfect, but everything is organized & ready, ensuring your server compiles successfully. Of course there is always room for improvement, I will have to dock you some points, because IMHO, everything would be a lot more noob-friendly if certain settings weren't pre-ticked, as this may confuse certain individuals, causing them to lose track of what they chose, and what was already chosen for them.

Ease: 3.5/5

I'm not going to lie, the GUI could use a lot of work, and IMHO you should make the tabs horizontal, but that suggestion isn't of to much importance at this current time.

Layout: 3/5

No grammatical mistake I have witnessed in your keylogger, but I did notice one in your "Closed Beta" thread. In the future please remember Bellow is the deep roar of an animal, and below is under or lower, you seem to have them a bit confused (no offense). Now in terms of the logs, no keys are excluded, I remember you had begun to discuss "GetASyncKey()", and how it could ruin the logs. If one of the individuals you had infected were typing to fast, the logs would be broken because certain keystrokes would not be detected. You had explained you alternative (will not reveal it), which would log all keys without fail, this is evident in the logs.

Without a doubt, it may be the most unique keylogger you will ever find, especially in terms of features, for example a nifty component known as "Specific Keylogging", it plays a role in keeping your logs clean, as well as only logging what you desire. On top of that, it has a built in file binder,

crypter, remote downloader etc. Not to mention the vaccine can kill said infection perfectly if you choose to test it on yourself, from what I've seen it doesn't even matter what settings you use, it was programmed to be flawless.

Originality: 5/5

In conclusion if your one of those individuals who are desperately searching for a tool that can ensure your spreading is successful, you have come across the right one. And in terms of the prices, they are fair, mainly because your paying for the quality of the keylogger. At the end of the day it is up to you the buyer, hopefully I have you convinced. And Classical, I wish you the best of luck with your sales, you have my vouch.

Asus - August 17, 2010, 12:30 pm

Nice update, finally the mouse lag is fixed.

Ronald Weasley - August 17, 2010, 2:00 pm

Is anyone else having problems with it totally not logging certain poeples' keys, but still taking screenshots and logging mouse?

Samuell - August 17, 2010, 2:02 pm

(Aug 17, 2010 02:00 PM)Depetrify Wrote: [\[CITE\]](#) Is anyone else having problems with it totally not logging certain poeples' keys, but still taking screenshots and logging mouse?

Update to the newest patch perhaps?

Castle Bravo - August 17, 2010, 2:20 pm

So...you can bind to pics/txt/etc?! (with this tool)

Samuell - August 17, 2010, 2:21 pm

(Aug 17, 2010 02:20 PM)Randy777 Wrote: [\[CITE\]](#) So...you can bind to pics/txt/etc?! (with this tool)
That's correct, the binder is compatible with:

.exe
.mp3
.txt
.jpeg
.bat
.html

And a few more :).

Byrnzie - August 17, 2010, 2:35 pm

Just purchased! going to try it out now!

Ronald Weasley - August 17, 2010, 2:36 pm

(Aug 17, 2010 02:02 PM)Classical Wrote: [\[CITE\]](#) Update to the newest patch perhaps?
Already had it.

message is too short.

(Aug 17, 2010 03:47 PM)Classical Wrote: [\[CITE\]](#) Haha, thanks mate, it'll be done eventually :).
Can't wait... this is like the fucking BEST logger out... it has fucking everything.

IT EVEN HAS A FUCKING CRYPTER IN IT LOL WTF?~!

Ex0z - August 17, 2010, 4:18 pm

Looks alot nicer bro, not to keen on the silver+black gui atm. How long till you think the chrome stealer will become more stable?

Samuell - August 17, 2010, 4:54 pm

(Aug 17, 2010 04:18 PM)J U i C Y Wrote: [\[CITE\]](#) Looks alot nicer bro, not to keen on the silver+black gui atm. How long till you think the chrome stealer will become more stable?

I'm gonna hopefully have all steals fully ready to go when this new GUI update comes out, I'll be

leaking pictures as I make them ;P.

Samuell - August 17, 2010, 6:46 pm

I'm back online MSN, I might be inactive for a while now that I'm working on a larger update.

hashimji12 - August 17, 2010, 8:44 pm

Bump to the Top
Great Work.

Samuell - August 17, 2010, 9:14 pm

(Aug 17, 2010 08:44 PM)hashimji12 Wrote: [\[CITE\]](#) Bump to the Top
Great Work.
Thanks mate, working hard on the new GUI :).

I was recently infected with a RAT by xviserial on his hacked account. I've manually removed it now, but I'm not sure how much damage it has done. (Stolen files, scammed people, etc). Do not believe anything I post/pm without solid proof that it is indeed me. I'm changing all my passwords ATM.

Samuell - August 17, 2010, 11:07 pm

Some new GUI pictures to keep you all entertained:

Ronald Weasley - August 17, 2010, 11:23 pm

GUI looks solid. Instead of just the hover colors like before, I really think you should have the color be changed when you are clicked in on one :D

Working great so far with .exes, please get binded .scrs working properly though :-)

Also I'm sorry for what happened... I know you aren't lying since I was on MSN with you while it happened.

Samuell - August 17, 2010, 11:24 pm

(Aug 17, 2010 11:23 PM)Depetrify Wrote: [\[CITE\]](#) GUI looks solid. Instead of just the hover colors like before, I really think you should have the color be changed when you are clicked in on one :D

b-ball-1 - August 19, 2010, 3:37 am

Hey could you explain these two features to me?

- Built-in Remote Downloader
- Custom Download URL

Like I get them, but just want to understand them properly.

vmartin - August 19, 2010, 3:39 am

(Aug 19, 2010 03:37 AM)b-ball-1 Wrote: [\[CITE\]](#) Hey could you explain these two features to me?

- Built-in Remote Downloader
- Custom Download URL

Upon execution - It will download any file requested..

For me, I have it set to download a copy of my RAT's server..

And it executes it after download..

So the victim will be infected with the keylogger and my RAT at the same time.

b-ball-1 - August 19, 2010, 3:49 am

And it executes it after download..

So the victim will be infected with the keylogger and my RAT at the same time.

Lol, yep, I actually knew that, i guess the "remote" just threw me off.

and I probably will do the same (download my RAT server), and "custom download url" would be a link to the RAT server OR w/e else you want downloaded..correct?

BTW @ Classical, the new GUI looks AWESOME!...Hopefully will be buying this soon!

vmartin - August 19, 2010, 3:52 am

(Aug 19, 2010 03:49 AM)b-ball-1 Wrote: [\[CITE\]](#) "custom download url" would be a link to the RAT server OR w/e else you want downloaded..correct?

That is correct. MSG2SHORT

Byrnzie - August 19, 2010, 4:01 am

just a little notice, this is great. i've infected 2 people already and the logs come in perfectly muahah!
THANKS

Byrnzie - August 19, 2010, 7:22 am

only problem is it wont connect to my ftp server or email :/

Roadkiller - August 19, 2010, 2:01 pm

nice program, but I just want to say you should really make a tutorial for it instead of wasting your time on support. Then the kids who can't figure out the tutorial can pay for support which will decrease the amount of people you have to help and increase your free time. Its just a suggestion and good luck on sales.

Samuell - August 19, 2010, 2:03 pm

(Aug 19, 2010 02:01 PM)Roadkiller Wrote: [\[CITE\]](#) nice program, but I just want to say you should really make a tutorial for it instead of wasting your time on support. Well it was still epic bro.

Anything classical makes will be epic and win.

Ronald Weasley - August 19, 2010, 5:06 pm

Soo, any guess of when it will be out?

b-ball-1 - August 19, 2010, 5:25 pm

Hmm.. are you going to put a feature where we can delete the file that the downloader executes

onto the victims computer when the keylogger is run, and put in another file, so that when the victim starts their PC that new file executes?

For example, If I make the keylogger download my RAT, then say 1 month later the RAT becomes detected, So will I be able to make the "downloader" remove my old RAT server and then make it Download a new RAT server which is FUD?

Sorry for all the questions man, but this looks amazing!..and I'm really looking forward to buying this very soon! and your saying that you will also give an external crypter with the \$25 package..WOW that is awesome!

Ronald Weasley - August 19, 2010, 5:28 pm

(Aug 19, 2010 05:25 PM)b-ball-1 Wrote: [\[CITE\]](#) Hmm.. are you going to put a feature where we can delete the file that the downloader executes onto the victims computer when the keylogger is run, and put in another file, so that when the victim starts their PC that new file executes?

Samuell - August 20, 2010, 7:33 pm

V2.0 is now officially released :).

Oxycotton - August 20, 2010, 7:57 pm

Wo woo wowoowow where to download/!?!?

Samuell - August 20, 2010, 8:28 pm

(Aug 20, 2010 07:57 PM)KiddBiz Wrote: [\[CITE\]](#) Wo woo wowoowow where to download/!?!?
I'm giving out updates to everyone who messages me on MSN :).

Oxycotton - August 20, 2010, 8:32 pm

Woahhh <3

this shit is HAWT!

fanle - August 20, 2010, 8:32 pm

Great logger does everything I need =D
Plus external crypter FTW

Also this new ui is fantastically sexy!!!

Oxycotton - August 20, 2010, 8:39 pm

Crypter= 100% FUD....

BotKiller is working fantastic!

Jotti scan of the crypter:

<http://virusscan.jotti.org/en/scanresult/385f09bb987a8a375eb8d4770cd703af30713fe4>

100% FUD...

Sexy job classical... doing good bro.

The French - August 20, 2010, 8:40 pm

Oh my gaad!!!! TheBypass v2 is released !! BUY NOWW OR GET YOUR COPY NOW ! ITS AMAZING ;D

Oxycotton - August 20, 2010, 8:42 pm

It is amazing... people will buy the logger just for the crypter.... its only 20\$, logger+ CRYPTER!!!

Samuell - August 20, 2010, 8:47 pm

Haha, thanks for all the support guys :).

i pnuts i - August 20, 2010, 9:05 pm

Have v2.0

Vouch For Classical This Guy Is Very Legit!

:)

Samuell - August 20, 2010, 9:11 pm

vmartin - August 23, 2010, 5:12 am

Bump for a amazing product..

Enable - August 23, 2010, 6:42 am

looks cool. i have to choose now between yours and irthstealer X:

Ex0z - August 23, 2010, 6:51 am

(Aug 23, 2010 06:42 AM)Enable Wrote: [\[CITE\]](#) looks cool. i have to choose now between yours and irthstealer X:

Go for this, it has the same if not more features. It is better priced and Classical actually cares about his customers unlike irthleet who is not a nice person to deal with.

Yes - August 23, 2010, 6:51 am

you charged me \$10 to upgrade to lifetime from hidden iye :(

MX-5 - August 23, 2010, 7:05 am

What the data.db stealer does? :O

Enable - August 23, 2010, 7:14 am

(Aug 23, 2010 06:51 AM)J U i C Y Wrote: [\[CITE\]](#) Go for this, it has the same if not more features. It is better priced and Classical actually cares about his customers unlike irthleet who is not a nice person to deal with.

dunno he was pretty nice to me X:

any way the one difference i found that this keylogger dosnt steal explorer saved password X:

Yes - August 23, 2010, 7:21 am

(Aug 23, 2010 07:05 AM)Topru Wrote: [\[CITE\]](#) What the data.db stealer does? :O

The data.db stealer steals the file from botclient that has all the persons authorisation codes saved in?

garvkapur - August 23, 2010, 8:22 am

If possible please add the following features:

1. Instead of showing "The Bypass Keylog From: User" as the subject, show this "The Bypass: Computer Name\User". As multiple computers could have the same windows user name.

2. Add an option to not log any windows in which no key is pressed. Currently it show a lot of logs which are useless to me like:

Quote:|--free word ico download - Google Chrome (8:15:42 PM) --|

|--Ico files for MS Word, Excel, PDF, JPG, etc... : excel, ico, files - Google Chrome (8:15:43 PM) --|

|--[VB.NET] File cloner + Icon changer - Page 1 - Google Chrome (8:15:44 PM) --|

|--icon cloner - Google Search - Google Chrome (8:15:46 PM) --|

|--Gmail - Inbox (12) - XX@gmail.com - Google Chrome (8:15:46 PM) --|

|--Inbox (608) - Yahoo! Mail India - Google Chrome (8:15:47 PM) --|

3. Add the Chrome Stealer back, even if it increases the size of the stub. It's really important for me. or try to find an other way out.

Diabolic - August 23, 2010, 8:32 am

This looks really good, I will be buying this very soon!

Automatic Coding - August 23, 2010, 9:39 am

I wantty :(

I only got \$12.90+1 pound, and i need to keep \$4 :(

Is there a discount for leet?

Samuell - August 23, 2010, 11:11 am

Hey guys I'm back online, message me on MSN for any questions/purchases.

(Aug 23, 2010 08:22 AM)garvkapur Wrote: [\[CITE\]](#) If possible please add the following features:

3. Add the Chrome Stealer back, even if it increases the size of the stub. It's really important for me. or try to find an other way out.

1.) I was already thinking about this, it'll be in the next patch!

2.) Hmm, I'll consider making this a toggle able option.

3.) Even if I add the chrome stealer back, it'll only snatch passwords on x32 systems, the source I'm using is outdated and I don't know how chrome encryption works :3.

garvkapur - August 23, 2010, 11:41 am

Did the new update come out , the one that you said you wanted to release last night??

5/5 * Vouch LOVE this amazing product :)

gmbblokus - August 24, 2010, 5:43 pm

I just want to correct you on something NO-UP != NO-IP

Titleman - August 25, 2010, 9:51 am

when the update will be ?

Samuell - August 25, 2010, 12:10 pm

Sales are closed for now, school is starting soon and between that and my paypals getting limited daily and having to get new VPN's for each one I just can't be bothered. Current customers will still get updates I release and I will still support you on MSN whenever I can.

I'll probably re-open sales once my life gets less busy or I find a way to keep a longterm paypal. Thanks for understanding, and sorry for any inconveniences I may of caused.
