Anyone still playing [/Dev/Null: Ports](#) this August? Have stopped playing this months ago when queuing was taking too long.

Just checked it out kind of confused on the concept but I'll keep at it

Im super confused on what to do there, but will be happy to learn and play with you if you want!
@Astrogen
Let me know if you want and we can try.

I just learned it with the help of [flavoral](#) a few days ago. It seems cool but kind of takes too long to play. It could take like up to 10 minutes or something.

Only a few people play just for fun. Even I don't remember playing last.

I would want to play again though. Hit me up if any of you want to play DNP with me.

Tried a couple times and was queued then never tried again

I gave it a few clicks here and there and then just gave up. It's not a game for me.

Almost forgot how to play it. I used to play months back, it was fun.
