User provided me with a phone number and once I inserted into postmates got back code from him.

Quick and easy done in one minute or less.

Great for other services.

Was told he has a website and API for this .

Are the number real sim-card number or are they voip?

matsonmar - August 8, 2020, 12:57 am

not voip. you cant verify [BRAND NAME REMOVED] for example with voip. i also have cheap voip for the websites who accept voip

I get asked for text verification on [BRAND NAME REMOVED] 1-2 times a month at least. Would I be able to receive the text verification whenever needed?
