Whats the fav car game to play on the simulator with a manual gearbox?

Xtreme™ - August 4, 2020, 10:51 am

I own a g29 racing wheel and trust me getting used to it is pain.

I am still trying to drive straight in forza horizon 4 without spinning out hahahah. Finding and tweaking the settings daily according to my driving style.

I also enjoy some euro truck simulator and dirt rally 2.0

I've never played a car simulator game. But if ever I try one I think I'll go for Bus Simulator and Project Cars 2. Base on the trailer this games look like will be enjoyable to play.

I would say Gran Turismo Sport and Project cars 2. They are very realistic and it has the physics of a real simulator. I played along so many years. And the graphics are absolutely amazing.

My two favorites by far are Euro Truck Simulator 2 and Flight Simulator.

Which are also the two more best simulations for me.
