Thread: [Huge collection of design resources for developers](#)

devlightz - August 4, 2020, 10:41 am

Came across a youtube video by that Traversy Media guy. He had created a huge list of awesome resources for web developers. These are pretty much all for front-end UI/UX stuff. I have already found a few really cool sites that I never knew existed. Heres the github page if anybody wants to check it out: [GitHub](#)

Credit for this list goes to Traversy Media on youtube I didn't do anything other than link it. Also, if you want to add something to the list that isn't already on there you can make a pull request.

Thanks for it. I wish I had time to dig in. Probably way over my head anyway. Good share nonetheless.

No problem. Definitely worth a look through if you do find the time. There is a lot of good stuff for beginners in there as well, if thats what you mean by over your head lol

There is a few different sites listed on that repo for generating color palettes. The one I think is the best that I use all the time is <http://colormind.io/>

Good share thanks for this!

Wayne - September 17, 2020, 3:35 am

Thanks a lot for the share

Will come handy in future for sure!
