Thread: [MULTIPLY YOUR MONEY - EASY WAY TO MAKE MONEY \[FRESH NEW METHOD\]](#)

Vichenzo - August 4, 2020, 10:57 am

I just came across a method that will multiply all investments made few times. The earnings with this method are 100% guaranteed !.

Without losing time, I will go into details:

What are the requirements:

- BTC (I suggest having \$300+)
- Access to many RDPS or mobile devices (each should have a different ip). This doesn't involve running scripts or something like that
- Free time to create accounts (each account takes about a minute to be created)

The method can be used until 7th August. After that you will not be able to use it !

You will be gaining money passively until 23th August. You should be able to at least double what you've invested until then.

After you complete the first steps it's completely automatical.

That said, there are 3 days left for everyone interested to setup and start earning from the method.

Price will start at \$150 BTC per copy and I will increase it with each sale made.

Contract me or PM here to purchase your copy

If you need more information - Vichenzo#8859

Current Price: \$150

We're taking advantage of a promotion which ends on 23th August. But the end date to join is 7th August

I don't have a clue why you are saying that. But you are reported regardless

Is it related to betting on games with promotions from the site?

from the site?

We're going to take advantage of a really good promotion. Reasonable earnings are from 2-10x what you invest

You can make whatever community alert you want against me. I haven't scammed anyone. You came from nowhere and started blackmailing me for money. What's wrong with you dude :D

Creating accounts on betting site, take advantage of their promotions".

Reason why you need to access different ips is because if the betting site reconize that you have more than one account you get your account banned.

Bet on same game on your multiple created accounts, your betting in multiple outcomes on the game.

This is a great method but its against any gambling websites rules, if you are unlucky the trader will catch you and you get banned.
