SUPER EASY NOOB FRIENDLY SPREAD METHOD

WELCOME TO THIS FREE RELEASE OF A FAKE CONSOLE-LIKE CALL OF DUTY HACK!

BELOW IS A VIDEO SHOWCASING THE CURRENT FEATURES WITH THIS MENU WHICH COULD CHANGE IN THE FUTURE WITH COMMUNITY VERSIONS *

[Video: <http://https://www.youtube.com/watch?v=HSe0t8fbURU&feature=youtu.be>]

FEATURES:

- Process Search (Choose whatever you want as it is fully customisable all you'd have to do is change the text and build it yourself)
- Option to re-search application processes without having to close the console
- Multiple fake toggles with the ability for you to add more to when building it yourself
- Beginner friendly source code - - > You can have never touched code before in your life, but if you have some common sense this language is easy to catch on to.

+ + Made in Visual Studio 19 + +
-Visual Basic Console Application-

Level: Beginner

I'm by no means a professional coder at all... just starting out with some simple stuff as I begin to learn more. *

Also, yes, you can download just the file itself below:
