Psychopath - August 5, 2020, 2:46 am

Hello, i was about to get diagnosed for ASPD but managed to talk it to ADHD.

My criminal record is long and keeps going on don't really care about it but i know it's an problem for my future.

My medical records says that i hate cops, education system, pretty much everything related to government etc...

Been analyzing my behavior since kid, used to be violent and been hiding my crimes from my family (when i lived with them) never got caught for my family members even tho they suspected me lot because of the money.

Anxiety is only problem for me, been sitting on computer for almost whole fking life, but now i have been moving more outside and making new friends seems like everyone likes me for some reason.

Also i don't understand anything about others feelings, never felt empathy on my life always been wondering what the fuck that is.

Skipped so many classes on school never got shit for it because i talked my self away every time, same with cops but last time was different since they collected evidence over 3 years for this catch.

Well only got caught for few crimes but not that's not an problem for me.

Almost everyone says im crazy or something.
