Thread: [\(Will pay \\$\\$\\$\) Remote Keylogger I can disguise in MP3 file?](#)

Pumper - August 5, 2020, 3:10 pm

I'm looking for a 100% UNDETECTABLE remote keylogger I can tie in a MP3 file.

I'd like to send an MP3 file to lets say John, when they open the MP3 I want the music to play, but I also want a keylogger to be opened and running in the background without them knowing.

Who can do this for me? I'll pay \$.

NYANxCAT - August 5, 2020, 4:56 pm

You can't do that. maybe you can use MP3 icon or spoof. but you can't convert an executable file to media.

Then what should I do? Really I just want his skype password so I can take screenshots and share his private messages because he scams many people, including me, and I want to expose him to the group chat as he has a cult like following. Brainwashing these sheep into thinking he's something when in reality he's broke.

bruh, u need an exploit to do this, and from my knowledge an mp3 exploit has never been invented.

Then how should I keylog them bro

Freak_OG - August 5, 2020, 8:50 pm

(Aug 5, 2020 08:24 PM)Pumper Wrote: [\[CITE\]](#) Then how should I keylog them bro just send an exe, bind it to a program using winrar sfx archives.

Accord - August 5, 2020, 10:29 pm

Authority is what you need, report it to them and theyll handle the case as you said he scam you.

Pumper - August 6, 2020, 11:21 am

What's an undetectable keylogger I should use.

(Aug 5, 2020 10:29 PM)Accord Wrote: [\[CITE\]](#) Authority is what you need, report it to them and theyll handle the case as you said he scam you.

Authority doesn't really care about online stuff from my experience. Especially if it's only a few thousand.

Idk if there is any FUD keyloggers, just use a crypter on any free keylogger and u should be good imo

I'm guessing a crypter will make it undetectable? Okay bro what cryptor do u recommend?

B FOR BADASS - August 8, 2020, 2:45 pm

Did you use any binder? Try that..

TgroupTeam - August 9, 2020, 12:51 pm

look this : youtube.com/watch?v=ADfEkWP62PQ&t=6s

its RCE exploit type of vulnerabilities is Heap-Based Memory Corruption due to Malformed TTF Font the payload and pdf get loaded into the heap and EIP somehow gets its value to point into that heap area

I would like to create my own exploit for that vuln

But i can't find any documentation even in exploit-db.

Have any good docs i can use?

Oh fuck... so what u r saying is that no one can create the exploit only if he is the one who found

the vuln?

TgroupTeam - August 19, 2020, 6:16 am

yup exactly :)

AMGTech - August 21, 2020, 3:17 am

I can help you exploit to:

doc/xls/lnk/bat/cmd/vbs/vbe/hta/ps1/js

With LNK you can use any icon and any file extension, sent you a pm
