Will do a review on it and perhaps a video clip of how it looks and works.

gigajew - August 11, 2020, 4:42 pm

If this is using IRC to communicate it better be SSL encrypted or at least encrypted before you send/rec commands. I mean IRC is a predictable communication protocol. Same with HTTP etc. Just my two cents.

It uses a xor encrypted IRC like protocol, its secure.

Selling a botnet via Discord doesn't seem like a good idea

ptlsolarcompany - August 17, 2020, 4:59 pm

I'm not sure you understand what is xor "encryption". It's everything except secure.

DWC, non-working bot.

Can't hold 30 bots.

Waiting for user to refund me, but he blocked me on Discord.

I don't see what's so hard to understand.

I guess English isn't your first language, and I guess thinking about what you say before you say it isn't your strong suit either.
