Thread: [Wtf do i push on Reddit?](#)

SIM-4799313 - August 6, 2020, 9:56 am

I have a lot of marketing potential on reddit. I can boost any post to 500+ upvotes, i can do many comments, etc. I have access to many tools.

But i dont have any idea what to advertise besides ewhoring.

Any clue, or anyone want to partner up?:P

Reddit has a lot of gamers and techies. Find a niche that's popular on there like those 2.

Boost an onlyfans. Or tech stuff. That's mostly what I see

1. Ewhore subreddits
2. Make a shopify store, go to subreddits like / needit and promote your offer
3. Affiliate marketing (this is hugeee)

Could always just boost random accounts with memes etc for karma and then sell said accounts to corporations. Can't remember the exact one but there's a subreddit for it.

I think the best are for gaming and technology.
