Thread: [Free meme face swap gifs](#)

SIM-1729678 - August 6, 2020, 1:55 pm

Let's do some fun face swaps shall we?

Send me some images of faces you want swapped and preferably the meme name you wanted it pasted on. And I will see if I can do it.

It NEEDS faces. So no anime or random cartoons.
The higher the resolution the better.

Sometimes it works out sometimes it doesn't, also depends on the gif.

Doing this for free because I enjoy it. Once I am done doing this I will make a tutorial. For now please don't ask how I did it. Or what app I used ?

Here is some examples of [Omniscient](#)

Yup it can, it's used a lot in the xxx scene as well to damage people.

Someone is planning on "watermarking" videos and images inside of cameras for Deep Fakes. I believe it was either Nvidia or AMD. Maybe Intel or someone, I can't remember. I had an idea to create a file format that has a lot of checks almost like ex-if data to tell if the file has been altered in any way, shape, or form to prove it is authentic. Something along those lines. This is too funny though.

I'm like 100% sure how you're making this... I've used this before just for fun.

Also, there's [another variant](#) to this in which we do the reverse.

Like here we're replacing the face on the gif with a photo, but the one below makes the image a moving gif.

I'm not sure if it's in mainstream or if many people know bout it but yeah it's fun.

Annnndddd... I'm not sure how to use these two to earn some cash... -_- ... Instagram maybe I think

P.S. Idk why it's uploading as a video instead of a gif and it could have been much cleaner I just made it quickly.

I don't want to waste my cash on them monthly just because I want to create one or two things a month.

That's why if I can get some good returns in subscribing to them only then I'll get them.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Yes, I am not a fan of their app. It's very size-limited and has some serious issues detecting faces.

Hence the custom program. A friend of mine made it for a music video he was making for an artist :)
