VOUCH COPIES

There are 5 0 vouch copies left!

Users who are L33T or up may reply to this thread in order to get a vouch copy!

This crypter is no longer for sale as the owner has decided to sell. He is currently selling for \$5,000.

Mobodon - August 8, 2020, 8:54 am

Manual Run-PE is soon going to be compatible with .NET applications.

Vouch copies still available! Contact me or OP to receive one or if you have any questions?

Jean-Jacques Rousseau - August 8, 2020, 9:23 am

I'd like a vouch copy! Send me a link to putty (32 bit) crypted. I will return shortly!

Recieved file, clean output, good job, only 50kb stub size.

However, the file has several dependencies that are not a part of the default windows installation, such as vcruntime api-ms-CRT dependencies (commonly known as "The C Runtime"). This will affect execution rates negatively; the author has been notified about this, it will require a recode of the stubs, as statically linking it will bring heuristic detections and give a stub size of <2MB. Screenshot attached of import table: <https://gyazo.com/d6eb3dcb2d35535fe27c719b4fc72fd7>

I could not perform a runtime scan due to their Anti-VM feature, will update post if the code

execution technique is something worth noting.

Other than that, clean output!

EDIT: author has removed CRT dependencies.

It seems there is currently an issue with non-console native applications. I will fix it and PM you as soon as possible!

Update: Issue has been fixed along with a couple of others!

Stanley - August 8, 2020, 1:31 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

FUD STATUS AS OF 8/9/2020

Not Detected

Proof:

Gauss - August 9, 2020, 11:10 pm

The crypter works as promised. Its Quick and easy to use.

I would recommend you to buy and use it. Good crypter, keep it up!

Caustic - August 10, 2020, 6:00 am

Vouch copies still available for this product! 3 vc's left before they are gone! Vouch copy is a one-time use.

mrjammy - August 10, 2020, 10:07 am

Ill take a vouch copy, looking for a stable crypter

greatjoel - August 11, 2020, 12:05 am

i'll take a vouch copy ! is this .net compatible ??

Caustic - August 11, 2020, 1:09 am

It is .net compatable, but we are no longer offering vc

scienciums - August 11, 2020, 1:54 am

Hey, it is a very cheap crypter you offering here sir! Are the runtimes good?

Mobodon - August 12, 2020, 4:35 am

Adrena has been updated to version 0.1.1. (There might be some additional down-time today for another fix)

CHANGES

- Fixed an issue where executables were misidentified as being .NET binaries
- Removed all dependencies (It used to be dependent on the C-Runtime libraries)
- Tweaked the packer for better entropy
- Tweaked the layout of the website to make it easier to use

Remember, if you have any issues visit the [SUPPORT](#) page on the website to find Discord and Skype links for contact, as well as an e-mail address!

(Aug 11, 2020 01:54 AM)scienciums Wrote: [\[CITE\]](#) Hey, it is a very cheap crypter you offering here sir! Are the runtimes good?

I have not tested as I do not have an account on DynScan or any other similar website.

Wink Emoticon - August 15, 2020, 5:32 pm

Is the site still being updated it looks like you guys are selling the project 2 day into my subscription.

Caustic - August 16, 2020, 1:49 pm

For the record, I am not receiving a cut of the selling price, and he took down the site of his own accord. There's nothing I can do about this.
