It will be a good idea to include a demo so people can see that the spoofer actually works. Also are you giving any vouch copies or big discount for a detailed review?

nulldev503 - August 10, 2020, 12:13 pm

interested but i need to setup sms gateway api or other '?

We used to run the service spoofy.cc , maybe you know that?

We have vouches on various forums, we are not looking to make a lot of sales, rather sell it to a few people.

Demo SMS can be requested.

PM me or talk to me on any contacts given and ill give more info

Timo - August 13, 2020, 12:51 pm

Did some updates! Will be included as well.

Timo - August 16, 2020, 10:29 am

Added more new stuff, ask about the updates!

Depending on needs?

I know for a fact that not all of them allow links or spoofer sender id. Or even if they do if they see that you use them for malicious purposes you get banned. Thats why I am asking. Also how much does it cost per sms and is there a feature to increase price for customers.

Exactly, that's what we mean with "depending on needs".

And yes, we have a full payment system integrated, you can set the prices of the SMS or calls to what ever you want.

Price you pay depends on country!

Nope, it's a source code, not a service.

SMS Spoofer:

Some good things to know:

- This is the source, there will be a manual that will explain each step for you, so everyone can set it up.
- Payment system and balance system included over coinbase commerce (you don't need an ID for coinbase commerce) if you want to run this public and earn profit from it.
- It's web-based, it's a web platform.
- Supports bulk sms sending.
- Links in SMS's are supported
- Most countries support both phone numbers and alphabetical senders.
- All requirements for this can be bought over BTC, so it can be completely anonymous.
- You can set prices for users if you want to run this public.
- Almost all countries are supported.
- You can send to unlimited numbers at once.
- Also comes with an admin panel that lets you edit users, set prices, blacklist for sender ID's, and more.

This can be used for ALL your marketing purposes (or to prank your friends).

We can also set it up for you for 100 euro extra.

Price is 400 euro, fixed (or 500 if you want us to install it for you).

- Payment system and balance system included over coinbase commerce (you don't need an ID for coinbase commerce) if you want to run this public and earn profit from it.
- It's web-based, it's a web platform.
- Supports all countries world wide.
- Both numbers and alphabetical are supported (not in some countries).
- All requirements for this can be bought over credit card, so prepaid credit card or virtual credit card

works.

- You can set prices for users if you want to run this public.
- Also comes with an admin panel that lets you edit users, set prices, blacklist for sender ID's, add countries, and more.

This can be used for ALL your marketing purposes (or to prank your friends).

We can also set it up for you for 100 euro extra.

Price is 400 euro, fixed (or 500 if you want us to install it for you).

Both sources = 700 euro

Combined source (so caller and sms in 1 source in 1 platform) = 800 euro

Terms:

- Reselling of the source, giving it away, or sharing it in any form without us agreeing is forbidden and will result in a scam report for the loss of sales.
- Pay first, receive after.
- After payment and after we send the source we are not responsible for your project.
