Thread: [Signature for Hire button causes signature to not be displayed correctly](#)

Exalted - August 10, 2020, 4:17 am
Here's yet another small UI glitch/bug.

If you have your signature spot for sale on the Sig Market a shopping cart icon will show in your signature, this icon causes a small formatting/alignment problem.

Here's my signature with the shopping cart icon:

Here's my signature without the shopping cart icon:

Here's my signatures bbcode:
Code
[size=xx-large][align=center][color=#0066FF][b>Exalted[/b>]/color][color=#ffffff].[/color]/align]/size][size=large][color=#ffffff][align=center]Developer. Hireable.
[i][u]Starting[/u]/i] at just [i][b>\$5[/b>/i]!/color]/align]/size]

Xerotic - August 10, 2020, 8:20 am
You use bad MyCode so start there. Never wrap LIST or ALIGN tag with anything.

My bad. I've unwrapped the align but it still displays slightly misaligned.

Code
[align=center][size=xx-large][color=#0066FF][b>Exalted[/b>]/color][color=#ffffff].[/color]/size]/align][align=center][size=large][color=#ffffff]Developer. Hireable.
[i][u]Starting[/u]/i] at just [i][b>\$5[/b>/i]!/color]/size]/align]
Or am I still missing something?

Nope that's just how it appears.

Okay, so just to confirm you can't do anything about it?

GIF showing that it is the icon/a element causing this:

Edit: It works by placing an empty character at the first line.
