Cryptollionaires will share trade signals 24/7 as our traders are based in various time zones.

What is the optimal amount to invest?

It is always important to invest sensible amounts appropriate to your financial status. It is possible to start with as little as \$100 and build this up to \$1000 over a period of time.

tvercetti - August 14, 2020, 11:22 pm

Do you trade on binance?
What should be the investment? Also, any copy trading that you offer?

hi_man - August 15, 2020, 3:28 am

I saw you Signals in the posts above.
I am from this industry only.
I want to ask you one thing.

What strategy do you use when you trade a signal ?

Why your first target is so near than the Stop Loss ? - This you are likely to hit the target and mark that trade as profitable which obviously results in 100 accuracy. I am eager to hear what you want to say on this ?

It is one of the key points any members of yours should know.

Also, which platform you'd prefer to trade on? Is it compulsory that the customers have to use the

all the signals has already hit the 1st target , rarely some trades could take few days to reach a very good profitable target but the most of the time target 2 and 3 are reached easily in a short time.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
