My only suggestion is to use better clips. It's good editing but every clip on here is just a regular quick scope / double kill. Nothing really that impressive in the montage itself and I got bored watching it like 35 seconds in.

I continued watching and that no scope around the 1:05 mark? put more of those in and it would be a fantastic montage.

I think I well do some Rocket league mini high light reels. While focus more on getting better clips for an actual montage I think that would be cool, but this is just a Minitage pretty much just clips from one day last week as I don't get to play to much currently. But I well try sir thank you

The song was completely out of sync. I feel like I was in a bar trying to watch your cod montage but the rednecks kept playing their bull riding music over it so I couldn't hear. I'd pick a better song to start. It seems like you're progressing with editing so next step is I'd try learn how to sync the song with the clips. I'd also try to pick some better clips, but if this was just a test for your editing then it doesn't matter. Good effort anyway.

Yeah sorry man it's very hard finding royalty free music to use and I'm not sure what's a good genre now and days for cod videos, what kind of genre do you recommend?

Love it, I'm thinking about making a montage too.

I haven't made one since MW2 lol, do you do your own editing?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I was using Inshot a couple of months ago. Filmmaker is very similar but is better imo.... Even ninjamotion is better than inshot...
