Thread: [Want to make interactive websites](#)

Political - August 12, 2020, 9:27 am

If I want to make interactive websites, what do I have to learn? I know I have to learn Javascript and all, and also do people makes websites from scratch or use Wordpress?

Kayvh - August 12, 2020, 2:03 pm

HTML, CSS/Sass and JavaScript (Angular, React or Vue), don't build websites with WordPress bro.

If you want to get started building interactive websites fast use Vue since it's easier to learn than Angular and React.

devlightz - August 12, 2020, 9:33 pm

JavaScript and then maybe some CSS frameworks like Bootstrap and Materialize. If you want to get more advanced learn a JS framework like React, Angular, Vue etc.. There are a lot of good courses available for free on youtube. PM me if you want some good recommendations.

To make a site interactive? No.

ethellooking - September 19, 2020, 8:45 pm

You can choose to learn that can take you a long time or you can simple it by hiring someone to do that for you

NycGio - September 20, 2020, 6:58 am

learn css and html then move on to sass and javascript (particularly a javascript framework) like reactjs
