(Sep 20, 2020 09:09 PM)RicksyBizniss Wrote: [\[CITE\]](#) Really sorry it took 3 days to drop the review. I had to go out of town unexpectedly.

I was actually very excited to do this review,
as I just received the graphics I bought that are thread style review graphics.
However it seems that my review is time sensitive so I will do a normal post one.

I really did not have any actually use this sort of thing, I am just a code junkie.
I read through what it claimed it could do and it all seemed pretty impressive,
it sparked my interest from a coding stand point at least.
So I wanted to see what it could do.

I was actually pleasantly surprised. It was simple and functional.
I got it up and running in no time with no issues at all!
Easy to set and tweak and it does everything for you!

It creates the account, downloads the content for you, edits all the info,
and the re-uploads it with the info that you specify.
I mean if this is your thing I don't know what else you could ask for.
From a geek stand point I am impressed with how fast it all works.
I also like the HD video only option, makes me think he actually put some thought into.
Some things are left half assed.

Honestly, I would love to see what other tech and gadgets soft has put together.
This tool is very impressive from someone who obviously knows what they are doing.

Great work soft! I VOUCH for this product 100%

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
