Thread: [When can we upgrade to r00t or 3p1c?](#)

\$JayViaLV - August 13, 2020, 8:43 am

I was just scrolling through the website as normal, bored as I can be awaiting some new techniques I can monetize from. Realizing I am eligible for my ub3r upgrade I went to do so and realized it is only Crypto I can purchase it with.

Then I looked at the URL because I was frustrated and just wanted to sit there and see if there is a way I can resolve this today because I want to do it today and then I saw this (redacted information obviously)

Code

`https://hackforums.net/upgrade.php?action=upgrade&level=2&my_post_key=thisyourinformationidontwannaseethisyo`

Look at the url in for after the function for the `upgrade.php?action=upgrade&level=` ??????

I went and just ticked them 2 spots up and realized there two more groups in the cloud somewhere. 3p1c and r00t

Am I late to the party or has this been a topic of discussion?

These are both old user groups that have been taken down. Omni made a thread about it somewhere a few years back.

Ub3r is a great choice for upgrading so you might want to consider getting it.

If you are going to convert your money here on the Currency Exchange section, make sure you go with a trusted member and use contracts!
